Role	: Subcon.

Description:

Sunrise-UPC is the wholly owned subsidiary of Liberty Global, is the largest private telecommunications company in Switzerland, and offers industry-leading mobile, Internet, TV, and fixed network services for private and business customers. We develop a user-friendly webpage and help them migrate their existing pages in AEM-Java to StoryBlok-Next.js

Responsibilities:

- Developing Screens using UI components like Next JS, SASS and StoryBlok.
- Using Typescript, object model, DOM manipulation and event handlers, TSX.
- Building reusable components for future use.
- Developing custom UI according to client's requirements.
- Daily activities based on sprint plan of Agile methodology model.
- Implementing business logic based on the requirement.
- Facilitated sprint planning, daily scrums, retrospectives, and stakeholders' meetings.
- Learn and understand user interactions.

Project 2:

Title : SMART C Planners
Environment : REACT JS, HTML5, CSS3, JAVASCRIPT, REDUX
Team Size : 4
Role : React.JS Developer

Description:

- It is an end-to-end project tracking web application for EPC companies. There are many stakeholders in the project such as project manager, warehouse manager, onsite engineering and supervisor.
- Each one of them has a different user interface. The application has many modules such as Construction planning, Procurement, Optimization billing of material, inventory and construction engineering.
- It helps in process Optimization and Process Parallelization.
- My part in this Application is planning modules and Optimization, billing of material, Inventory, and construction engineering.
- Project is developed in react as front-end library and Asp.net web Api as back end.
- Integrate API using Axios and pass the information through context Api.

Responsibilities:

- Developed Screens using UI components like React JS, Redux-saga, HTML5, and CSS.
- Confident in using JavaScript, object model, DOM manipulation and event handlers, JSX
- Building reusable components and front-end libraries for future use.
- Did wiring of the components with redux and redux saga.
- Implemented sagas as a middleware.
- Implemented routing for all the components developed. created and injected reducers and sagas in store
- Daily activities based on sprint plan of Agile methodology model.
- Implementing business logic based on requirement.
- Learn and understand user interactions.

Project 1:

Project Name : Healthy Chef Creations
Tools & Environment : REACT JS, HTML5, CSS3, JAVASCRIPT
Team Size : 8
Role : React.JS Developer
